Offer & Request

R&D cooperation within HORIZON 2020

The AquaBioTech Group has participated in 14 FP6 and FP7 projects both as an RTD and as an SME. We are now looking forward to participating in Horizon 2020 projects. The company has extensive R&D facilities as well as innovative and proven technology in Recirculation Aquaculture Systems. We have a vast awareness of the current market needs and demands and therefore have strong capabilities in dissemination of R&D outcomes and commercialisation of the final product. Most importantly, our personnel come from diverse backgrounds and are experienced and highly qualified.

<http://aquabt.com/eu-projects>

SPECIFIC AREAS OF RESEARCH

Aquaculture R&D

Health and Disease Prevention

Aquatic Nutrition Research

Nutraceutical Development

New Species Development

Production Techniques

Hatchery Technology

Algae Production

RAS R&D

Wastewater Treatment

Aquaponic/Hydroponics

Energy Efficiency

The AquaBioTech Group has set up a LinkedIn Group specifically for Horizon 2020 Blue Growth topics. The idea is simply to bring together ideas and entities interested in Horizon 2020 research in the Blue Growth area, i.e.: Ocean renewable energy; Aquaculture and Fisheries; Maritime, coastal and cruise tourism; Marine mineral resources; blue biotechnology and; Marine Sciences and oceanography.

We are always looking to participate in innovative research proposals in the areas of our interest and strong consortiums we could collaborate with.

http://www.linkedin.com/groups?home=&gid=5137641&trk=anet_ug_hm

Feel free to join the group and participate in the discussions.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES

Experience as RTD and SME participant in many FP6 and FP7 projects

Experienced and highly qualified personnel with diverse backgrounds

Innovative and proven technology in Recirculating Aquaculture Systems

Dissemination of R&D outcomes and commercialising final products

Awareness of the current market needs and demands

Extensive in-house R&D facilities

Cooperation Offered

- 1. Technical cooperation**
- 2. R&D Cooperation**

Cooperation Requested

1. Technical cooperation
2. R&D Cooperation

Aquaculture R&D (Fish Health and Nutrition Research)

ABT Innovia is an independent aquatic biotechnology and aquaculture research and training entity with its own dedicated Research & Development (R&D) facilities based in Malta. With a large number of bio-secure testing facilities using the latest RAS technology, we are able to undertake work on a number species, ranging from coldwater Salmon, Trout and Charr, through to Tropical species such as Tilapia, Shrimp and Asian Sea bass.

The facility is able to provide tailored R&D services to clients from across the aquaculture sector, with needs ranging from the formulation, test-batch production and in-vivo testing of aquatic animal feeds, additives and enrichments, through to vaccine efficacy and safety testing. The facility also undertakes a large number of larval trials for various species, testing live feed enrichments, larval diets and production techniques using new technologies so as to benchmark hatchery and grow out systems.

ABT Innovia, as an independent testing facility, ensures experimental results of the highest integrity and quality, whilst all enquiries received, project discussions with and results generated by ABT Innovia are be treated in the strictest confidence with no intellectual property (IP) retained by the facility.

<http://www.abtinnovia.com/>

At ABT Innovia we welcome enquiries relating to R&D from a wide variety of interested parties including those involved with developing, among others:

Aquatic animal feeds, both formulated and live
Feed additives
New species to aquaculture
Live feed enrichment products
Pro- or pre-biotic feed or water additives
Aquatic animal vaccines
Parasite treatments
Hatchery technologies
System technologies

Cooperation Offered

1. Technical cooperation
2. R&D Cooperation

Offer

Recirculating Aquaculture Systems (RAS)

Recirculation system development within aquaculture has entered into a new chapter and the AquaBioTech Group has been at the forefront of this technology for many years.

The AquaBioTech Group has developed number of highly efficient and cost effective recirculation aquaculture systems (RAS) for hatchery, broodstock and on-growing operations. The systems are customized according to the species and production level and are proven technologies in the field.

The AquaBioTech Group has its own proprietary RAS designs for a variety of species that cover those of major commercial importance. The company is constantly fine tuning the overall performance of its design and technology at its demonstration and R&D facility in Malta. The systems we offer are the result of many years of, research development and client feedback.

The AquaBioTech Group has its own RAS designs for a variety of species that cover those of major commercial importance.
